

Het Pakt!

Is a group of cooperating artists.

We create multimedial installations in which dream and fantasy play the leading role. Especially video, photography and projection in combination with everyday objects are applied.

The participation of the visitor in our work is important. By means of a simple walk, a bicycle excursion, a travel with a elevator, a bus ride, people are thrown in our work and everything becomes new and unforeseeable.

For this reason of commitment we search for a low threshold so people can easily step into our work. Often we choose public places as a location (camp-site, parking place, streets, parks etc.).

New and daring definitions are pronounced concerning the individual character of these places. With a light taste of surreality we immerse the visitor in our world and attempt to touch him or she in body and soul.

www.hetpakt.com
